

Homework for the Week of April 7th

1. Read nightly and log your reading
2. Visit RAZ Kids and Dream Box
3. Homework is due Friday, since Monday was a holiday.

In Language, we are continuing to answer questions about texts using information from the text (proof) along with our own ideas. The students are working hard to make sure they use part of the question in the answer.

This week, read a text of your choice.

What type of text did you read (fiction, non-fiction-persuasive, procedural, recount, narrative or descriptive)? What was the author's PURPOSE (PIE)? Use details from the text to support your answer.

Name of Book: _____

Over the next two months for math homework, we will be reviewing math skills in order to prepare for E.Q.A.O. This week, please solve the following problem:
Ethan has 85 stamps in his collection. He gives away some of his stamps and has 67 stamps left. How many stamps does Ethan give away? Justify your thinking. (Remember to include a therefore statement. Think about all the strategies you have learned this year)
